

ARE WE JUST A SHADOW?

Bruna Rotunno

“Are we just a shadow?” is an ongoing project about lost identities. I’m focusing on showing fragments of various cityscapes where the human being existence is confined in urban grey areas.

The existence is dematerialized, and we becomes shadows and projections in the eyes of others.

These projections are also the multiple identities we are used to playing on screens, hidden in the shadow of our devices ,in a virtual environment in which we are defragmentated .

It is actually a work that aims to find the connection between us and the whole , in order to regain control on our own identity.

I’m an italian female photographer, based between Milan and Paris.

My work, including portraits and landscapes , explore and transcends genres and alternates visionary sensibility to the immediacy of reportage. My vision is developed on stories telling of possible differents realities, using tangible and intangible approaches, propulsive elements of investigation and research.

My artwork has been exhibited in numerous galleries in Europe and Asia.

I’m a video maker and commercial director.
