

# Celebrating Women in Photography Today

## KIT

### Emma Freeman

#### **Kit (from the series “100 Yards”**

I started this series some years back, in 2005, focusing on a sense of place and time in their lives. All these images were taken 100 yards from their home and families. Kit has had a challenging few years. Unable to find a comfortable place and sense of “self” within his peer group and academic endeavours; sports and being in nature helps him find a quieter place in his mind’s eye.

#### **Julian (from the series “100 Yards”**

Until Julian’s grandchild, Venetia, was born, I had found this silent contemplative man distant and too aloof to connect with. I have known him since I was a young child. The metamorphosis was profound and joyous to witness. My lens didn’t let me down.

*Devonshire photographer, grew up in Switzerland, working in Kent and mothering 4. Since winning the Portrait of Britain, I was nominated for the Royal Photographic Society’s Hundred Heroines campaign. I was one of the artists selected to be part of the 209Women exhibition at Parliament. Current project: “I.C.E” Igniting Climate Education aims to be a body of work of portraits of our leading scientists, authors and environmentalists focusing on Climate Change. In doing so, I hope to bring these portraits to “light” by means of photography and copy. With the use of digital platforms as a segue to learning and enthusing our younger scientists of today.*
