

Celebrating Women in Photography Today

IMAGINARY MEMORIES

Irem Turkkkan

I became interested in the subject existentialism for about two years. I was in a mental state that need some answers. The more I tried to find, the more I found myself away from the people and the urban, modern world. This led me to walk and wander constantly. Trips I've made was the beginning of this project. As I've spent time in solitude, I realized that knowing and finding myself is the key thing.

imaginary memories is an ongoing project about journeys in search of lost things like the self, the soul, reality and memories.

Irem Turkkkan is an artist based in Istanbul. Her work mainly focuses on nature and landscape and the living creatures' presence in it. She received her bachelor degree from Visual Communication Design in 2018. Now, she studies MA Photography Arts at the University of Westminster.
